Solar Quote Comparison Sheet

From Solar Near Me (solarnearme.info). Fill in one column per quote so you can compare them line by line.
How to use: write one quote per column. Divide the cash price by the system size in watts to get the price per watt. The Example column shows how to fill it in.

What to compare	Example	Quote A	Quote B	Quote C
The company				
Company name	Example Solar Co.			
Florida license number (CVC or EC)	CVC0000000			
Who installs (own crew or subcontractor)	Own crew			
The system				
System size (kW)	13.0			
Expected kWh in year one	18,200			
Panel model	Example 410 W panel			
Inverter model	Example microinverter			
Battery model (if any)	None			
The price				
Cash price ($)	$27,690			
Price per watt ($)	$2.13			
Total price with the company's loan ($)	$34,500			
Extra cost of the loan ($)	$6,810			
Lease monthly payment, year 1 ($, if any)				
Lease yearly increase (%, if any)				
Warranties and service				
Workmanship warranty (years)	25			
Roof leak warranty (years)	10			
Panel and inverter warranty (years)	25

Main electrical panel upgrade included?	Not needed			
Permits, HOA and utility paperwork included?	Yes			
Monitoring included (and for how long)?	Yes, free for life			
Estimated timeline to turn on	6 to 10 weeks			
Notes				
Promises made (make sure they are in the contract)				
Other notes				

Tips

- A fair 2026 cash price in Florida is often around $2.13 per watt (Solar Near Me estimate). Much higher or much lower deserves questions.
- Ask every company to use the same 12 months of electric bills so system sizes match.
- Check each license for free at myfloridalicense.com.
- Want help comparing your quotes? Visit solarnearme.info/start-saving or call +1 689 407 6813.
